

## Metering

### Remote reading of meters with analogue or pulse output

With TeleControlNet gas-, water- and electricity meters can be read remotely. All meter readings are central registered. Through a secured web portal, energy consumption can be easily retrieved. Daily, weekly, monthly and annual reports can easily be made available.

### Meter readings in charts & reports

- Various charts are available in the web portal.
- Various chart combinations with other measuring values.
- Reports are standard and/or custom made.

### TeleControlNet server

- Registers meter readings that are uploaded by the TeleControllers.
- Meter readings are available through the internet.
- Multiple locations/ TeleControllers can be connected to one web portal.
- The web portal is accessible for multiple users.

### The meters are connected to a TeleController

- Up to 16 meters with pulse output.
- Up to 2 meters with analogue output.
- All meter readings are also locally buffered.
- Built-in 3G modem.
- Secured communication with the TeleControlNet server.
- Periodic uploading of the meter readings.
- Real-time meter readings can also be forwarded via the web portal.
